

“Post Normal Science – perspectives & prospects”

A reflective workshop: 26-27th June 2009: Oxford

Version 0.6

12-06-09

On the occasion of the 80th birthday of Jerry Ravetz, this workshop aims to review some ‘perspectives and prospectives’ on Post Normal Science.

When we first thought of this workshop, we imagined that a couple of dozen old and new friends would congregate and see what has been going on with PNS. We were surprised and gratified to discover a much broader interest

In keeping with the exploratory nature of PNS thinking, we want to accommodate all those who wish (or need) to present a paper, with the creative atmosphere of an intensive workshop. There are enough breakout rooms, for as many contributions as can be made.

These contributions can be as formal or informal as anybody wishes, and it looks like a mixture of both. The breakouts are flexible (so far we have 19 contributions in 12 hours of breakout time) but we would steer towards a discussion mode rather than conventional presentation from the front. So this might be about 15 minutes presentation and 15 discussion for each contribution, plus panel discussion at the end: some are using powerpoints or flipcharts (the facilities are available).

For papers which are clearly heading towards a journal special issue, the more formality the better, in terms of on-line access & format. We have an agreement with the editor of *Futures* to run a special issue with six papers from the workshop. If there are more suitable papers then we could approach another journal for a special issue. Other papers and contributions will go on the PNS website.

Location:

St Anne’s College

(the Ruth Deech conference centre is the first building on the left from the main entrance)

Woodstock Rd

Oxford, OX2 6HS, UK
